

# Afterschool STEM Learning Programs Benefit Wyoming

Photo: Greater Wyoming Big Brothers Big Sisters

# STEM

Science • Technology • Engineering • Math

Afterschool STEM learning builds skills for our future by teaching critical thinking and problem solving skills that will lead to shared economic and social prosperity.

## Skills For Our Future

Afterschool programs spark interest and engage children in STEM skills to prepare them for success in school and life.

## Critical Thinking & Problem Solving

Children fluent in STEM skills become critical thinkers, problem solvers, and team players

## Economic Prosperity

Finding solutions to modern challenges requires creativity and innovation. A workforce proficient in STEM will drive our economy and build shared prosperity.
